

Before you go scuba diving, remember....

BWRAF

After setting up all of your scuba equipment including inspecting your tank, securing your BCD to the tank, setting up your regulator, and turning on your air, you are now ready for the BUDDY CHECK!

B – BCD/ Buoyancy

Test the inflator button and the deflate valves!

W – Weight

Ensure weights are secure

R – Releases

Teach your diving buddy how to release all straps incase of an emergency

A – Air

Take a quick breath or two from the regulator and alternate air source. Make sure the cylinder valve is fully open.

F – Final Check

Gather your gear, secure loose hoses,, other objects, and do a final head to toe check!

Now you are ready to get diving!

Remember to always stay near your partner and stay safe!
